

BW Design Group was recognized by Rockwell Automation as System Integrator Partner of the Year,

reflecting the impact our System Integration teams have in delivering complex, high-performance solutions across Food & Beverage, Household & Personal Care, Life Sciences, and Advanced Technology manufacturing environments.

BW Design Group helps clients realize capital strategies across the built and digital environments from Strategy through Commercialization™. Across markets, our System Integration teams are advancing complex, high-impact programs—enabling clients to scale production, accelerate time to market, and unlock the full value of their capital investments.

We operate differently

FULLY CONNECTED

Combining design, construction, digital transformation & controls, and regulatory compliance, BW Design Group connects System Integration to the broader realities of capital projects, ensuring full alignment with how facilities are delivered and operated.

END-TO-END SOLUTIONS

Complementary in-house capabilities including panel design and fabrication through ControlTech Automation and operational support through DG360, streamline how we execute and enable complex automation programs at scale.

POWERED BY A MANUFACTURER'S MINDSET™

Born from a manufacturing and technology company, we built a business model and approach centered around our clients' distinct challenges. We think beyond project completion and measure success by performance and return on investment.

PARTNERSHIP > PROJECTS

This recognition reinforces BW Design Group's position as a trusted partner for clients seeking to translate capital investments into operational performance and sustained commercial impact. And it honors the strength of our partnership with Rockwell Automation and the breakthrough work our System Integration teams are delivering.
