

**Analytics Solutions**

- EIM
- Analytics & Reporting
- PIM
- MDM
- Data Quality
- Data Collection, Integration, & Transformation

No matter the client's stage in adoption of analytics and reporting, Design Group provides expertise to identify, target, and rationalize value domains that can manifest into derived value.

Our solution teams engage at the executive and operational levels to determine required Analytics capabilities, identify data and information requirements, and plan a course of action to drive an overall Analytics strategy. We collaborate with the current executives and staff to develop an overall adoption plan to yield the best results.

Enterprise Information Management (EIM)

Optimize information capabilities across your business operations

Analytics & Reporting

Discover, interpret, and define meaningful patterns and insights of useful information across business and manufacturing operations

Product Information Management (MDM)

Identify, align, and rationalize master and reference based data across business stakeholders, systems, and processes

Data Quality

Ensure data consistency across the spectrum of business systems, operating groups, and stakeholders to ensure a positive trending in overall data quality

Data Collection, Integration, & Transformation

Capture and integrate data from various processes and systems

Design Group operates from 45+ offices in the US and India providing engineering, consulting, and technical services to the world's leading companies in the Food & Beverage, Life Sciences, Advanced Technology, Industrial, and other market sectors. Our nearly 1500 technical and engineering experts have direct industry experience in industrial automation, control system integration, facility and process engineering, architecture, construction management, regulatory compliance, enterprise technology, and other consulting services.
