

Infor XA Training

Design Group knows how important it is to have well-trained and knowledgeable employees. By investing in your employees with continuing education, you are providing them with the skills to improve not only their own productivity, quality, and performance, but that of your entire organization. Your company will also see higher employee retention rates and improved recruitment.

Design Group offers a wide variety of training services. As an Infor Channel Partner with both Infor XA and Infor CloudSuite Industrial (SyteLine) customers, we offer product solution training to ensure that you are maximizing modules and utilizing products to their full potential.

Infor XA Training

Power Link Basics

Let loose the power of the Infor XA's graphical user environment by learning the basic tools used for all business objects. Acquire skills to customize the interface, getting the data and functions you need fast. Apply lean concepts to have everything you need to do the job close at hand. Course contents: Main Window, List Window Features and Definitions, Menu Bar, Tool Bar, Viewing an Object and Card File, Customizing Views, Subsets, Sorts, Cards and Cardfiles, Preferences, Other Inquiry Tools, Printing Reports. Hands-On exercises will be done in your environment to reinforce learning.

Power Link Advanced

Advanced functions can put the wow in your ERP when you further customize XA to complement how your business runs. Course contents: Templates, Workbenches, Workspaces, Presentation Schemes, Graphs, Compound Cards, Export to PDF, Quick Change, User Actions, Host Job, Host Print and Column Statistics, Open Action, Cascade Subsets. Hands-On labs in your environment ensure rapid use of the skills learned.

Enterprise Integrator Basics

Expand your base ERP by adding your own custom business objects. Fully integrate new data making it look like its part of the Infor XA application. Course contents: Overview, Primary Business Objects, Secondary Business Objects, Code Files, Text Objects and User Exits.

Enterprise Integrator Advanced

Create full blown applications to add to your base ERP by leveraging all that Enterprise Integrator offers. Perform advanced transactions, understand the available security options and integrate easily with outside systems. Course Contents: Logical Transactions, Data Sources, Deployment Profiles, Security, Content Security, Publish and Subscribe, Web services, Transaction Broker, Administrative Concepts, User Definition Administration. Lab exercises allow to you quickly grasp concepts. See these features at work as you complete exercises in your environment.

System-Link

Learn the concepts and put them to use developing a mini project to load item prices replacing traditional offline load. Course Contents: Overview, Connection options, XML Overview, Types of System-Link Requests (Query List, Fetch Next, Query Object, Optimization, Query Maintenance History, Query Relationship, Maintenance Actions (Create, Update, Delete)) and the System Link simulator.

ION

The "Intelligent Open Network" or ION can seem mysterious and complicated. Learn about the components that comprise ION and how to utilize the power of this middleware framework for unparalleled end-to-end efficiency. Course Contents: Overview, Events, Connectors, Work Flow.

XA System Administration

Administration of your environment is vital basic knowledge. Understand these foundational components to make your system run effortlessly. Course Contents: Environment Architecture, Extended Environment Support, Library Lists, Shared vs Separate Environments, XA Cross Application Support, XA Job Management, XA Unattached Jobs, Group Jobs, Menu Maintenance, Create Tasks, Menu, Actions, XA Triggers, Printer Overrides, Re-Organize XA files, Apply XA PTF's.
