# Design Group

Paperless Validation

Design Group is a leading supplier of Commissioning & Qualification, Computer System Validation, Laboratory System Validation, Process Validation, and Quality Engineering services to the cell and gene therapy, biotech, pharmaceutical, and medical device industries.

To enhance our specification and validation services provision, we have partnered with Kneat Solutions to provide KneatGx, the paperless validation solution trusted by many of the world's largest life sciences companies.

As a Kneat Services Partner, we are qualified to map, optimize and digitize your existing work processes and documentation, and to scale your processes across an unlimited number of sites.

Purpose-built for Life Sciences, KneatGx digitizes the entire validation lifecycle, enabling users to author, review, approve, test-execute, trace, manage exceptions, and report on any validation process in a 21 CFR Part 11 compliant SaaS solution, that's securely accessible online - anywhere.

Implementing KneatGx eliminates paper from all stages of your validation lifecycle with proven results including cycle time efficiencies, speed to market acceleration, cost savings, and data integrity assurance.

Learn more about KneatGx at **kneat.com.**

Design Group operates from 45+ offices in the US and India providing engineering, consulting, and technical services to the world's leading companies in the Life Sciences, Food & Beverage, Advanced Technology, Industrial, and other market sectors. Our nearly 1,500 technical and engineering experts have direct industry experience in industrial automation, control system integration, facility and process engineering, architecture, construction management, regulatory compliance, enterprise technology, and other consulting services.

Kneat Services Partner

KneatGx Features
- Organize by site, process, or project
- Build templates & generate documents
- Review & approve documents
- Paperless test execution
- Comprehensive reporting
- Generate audit trails

KneatGx Benefits
- Improves productivity
- Significantly reduces time-to-market
- Changeover & cycle time improvements
- Data integrity compliance

Design Group Benefits
- Process Mapping
- Streamline existing engineering & validation migration
- Procedure, change management, & training support.
- Subject Matter Expertise for your processes
